Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-6, drawn to a modified sarcosine oxidase, classified in class 435, subclass 189.
- II. Claim 7-10, drawn to DNA, host cell and recombinant production of the enzyme of group I, classified in class 435, subclass 60.1.

The inventions of group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the invention of group I and II are independent chemical entities that have different structures, functions and are not disclosed as capable of use together.

Inventions I-II are distinct for the reasons given above. Because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
